ANGELIER ALFRANYER RAMIREZ BRAVO

PROFESSIONAL SUMMARY

I'm a software development professional with over five years of experience, specializing in web technologies and excelling in .NET, complemented by a strong foundation in React.js. My experience has focused on coding and delivering high-quality software solutions, always aligning business demands with technological imperatives. My career is distinguished by unwavering dedication to excellence and a focus on continuous improvement. I have a deep passion for facing new challenges and embracing learning opportunities that foster my professional and personal development. My proactive attitude and results-oriented approach have allowed me to contribute effectively to cutting-edge projects, meeting the expectations and needs of end-users.

EDUCATION

BACHELOR'S DEGREE IN COMPUTER SCIENCE

University of Oriente, Venezuela

2011 - 2018

- Specialization in Computer Science and Information Technology.
- Key competencies in programming, systems analysis, database management, and project management.
- Practical experience gained through academic projects and extracurricular activities in the IT field.

CERTIFICATIONS

Professional Internship Program

Web Forms / From 03-23-2016 to 05-23-2016

NORKUT S.A

Acquired competencies:

- Development of web applications using C#.
- Implementation of multi-layer development methodology.
- Experience with web technologies, specifically under the MVC paradigm.
- Connections to SQL Server database servers.
- Use of WCF services for communication between applications.

LANGUAGES

Spanish: Native

English: Intermediate

TECHNOLOGIES AND TOOLS

Database:

- Relational: SQL Server, MySQL.
- Non-relational: MongoDB.

Platforms and Frameworks:

- .NET Framework and .NET Core.
- Web APIs.
- Experience with cloud solutions, especially in Azure.
- Azure Service Bus.

Architecture and Design:

- Microservices.
- Clean Architecture.
- Vertical Slice
- Architecture.
- Design Patterns.
- SOLID principles.

Application Development:

- Git.
- Team Foundation Server (TFS).
- Agile methodologies (Scrum, Kanban).
- REST API.
- Continuous Integration and Deployment (CI/CD).

Other technologies and concepts:

- LINQ.
- Fluent API.
- Code First.
- Middleware.
- Filters.
- Dependency Injection.
- Repository Pattern.
- Windows Communication Foundation (WCF).

PROFESSIONAL EXPERIENCE

Software Developer | Midas Consultores S.A.

May 2019 – Present | Mendoza, Argentina

Development and leadership in creating modern applications using .NET Core, .NET Framework, C#, MVC, Entity Framework, LINQ, JavaScript, SQL Server, NoSQL, React.js, Redux, and GraphQL.

- Innovation in microservices and RESTful web APIs, leveraging Azure Cloud capabilities.
- Design of software architectures and application of advanced design patterns.
- Technical leadership and effective management of development teams.
- Proactive participation in all Scrum phases, including Sprint planning, daily stand-ups, retrospectives, demonstrations, and release planning.
- Implementation and continuous improvement of Continuous Integration and Deployment (CI/CD) practices.
- Close collaboration with Product Owners to define and refine Minimum Viable Product (MVP) requirements.
- Conducting biannual evaluations and providing constructive feedback to the development team.
- Conducting job interviews and contributing to team growth. Development of strategies for successful software project execution.

ANGELIER ALFRANYER RAMIREZ BRAVO

PROFESSIONAL EXPERIENCE

Software Frontend Developer | CAPTAR COMUNICACIONES S.A.

Sep 2017 – Jun 2018 | Mendoza, Argentina

- Development of cutting-edge applications with Angular, JavaScript, CSS, and Bootstrap, specializing in responsive and adaptive layout techniques.
- Active collaboration in software engineering processes and testing at Captar Comunicaciones, ensuring quality and efficiency.
- Rigorous software validation to guarantee customer requirements satisfaction and delivery of customized solutions.
- Comprehensive management and maintenance of existing systems, focused on optimization and continuous updates.

Full stack programmer | Workana

Mar 2017 – Aug 2017 | Freelancer

- Experience in developing solutions using Angular 2 and 4, JavaScript, CSS, Bootstrap, and interface design. Development of solutions with .NET technology, following the MVC RAZOR paradigm, multi-layer web development, SQL databases, and WCF services.

SKILLS

Teamwork: Proven ability to collaborate effectively with colleagues from diverse levels and disciplines to achieve common goals.

Communication: Ability to convey ideas clearly and effectively both verbally and in writing, facilitating understanding and teamwork.

Proactivity: Proactive attitude focused on problem-solving, anticipating needs, and constantly seeking opportunities to improve processes and outcomes.

Initiative: Ability to make informed decisions and take responsibilities, even in challenging situations or outside my comfort zone.

Responsibility: Commitment to timely and high-quality delivery in all assigned tasks, demonstrating reliability and dedication in every project.

Adaptability: Flexibility to adjust to new circumstances, technologies, and work environments, with an open and receptive attitude towards change and innovation.

Ethics: Adherence to the highest ethical and professional standards in all actions and decisions, maintaining integrity and respect in all work interactions.

ANGELIER ALFRANYER RAMIREZ BRAVO

PERSONAL INTERESTS

Travel: I have had the opportunity to explore various destinations in the United States, the Caribbean, and other places, which has provided me with a broad cultural perspective and enriching experiences.

Sports: I enjoy both playing and following soccer and baseball, finding them a way to stay active and connected with friends and family.

Movies: My interest in movies spans genres like science fiction, suspense, and action. I enjoy both classic films and new productions that challenge the imagination and offer thrilling cinematic experiences.

Astronomy: I am fascinated by the study of the cosmos and the exploration of the universe, marveling at the vastness of space and its wonders.

ACCOMPLISHMENTS AND PROFESSIONAL EVOLUTION

Throughout my career, I have successfully led a series of software development projects that have made a significant impact across various industries. Some of these notable projects include:

Personal Projects:

"Mis Horas": As a software developer using Angular and PHP technologies, I designed and developed the "Mis Horas" employee management system for the petroleum industry. This platform optimizes human resources management by automating processes such as hour tracking, leaves, payments, and other personnel management aspects. My contribution helped enhance operational efficiency and productivity in a critical sector for economic and energy security.

Projects at Captar Comunicaciones:

"Captar Pagos": I participated in the development of the "Captar Pagos" platform, an online payment management solution that enhances administrative efficiency across different sectors. As a software developer, I implemented key functionalities, optimized performance, and ensured platform security. This strengthened its capability to improve business efficiency and competitiveness. Technologies used included Angular and .NET Core 3.1 with SQL Server databases, significantly enhancing the payment processes for real estate agencies, consortia, and various other businesses.

ANGELIER ALFRANYER RAMIREZ BRAVO

ACCOMPLISHMENTS AND PROFESSIONAL EVOLUTION

Projects at Midas Consultores:

"Geco": In the "Geco" project, my role as a software developer was crucial in designing and implementing a container management system that optimizes logistics and the flow of container products entering and leaving Argentina. I contributed to developing functionalities for managing empty and full containers, scheduling shifts, and optimizing their positioning. This had significant implications for efficiency in international trade. With the system handling 300 containers daily initially, it increased capacity to 600 containers per day, marking a substantial increase in throughput.

"NRSolution": I participated in the development of the pharmaceutical laboratory system "NRSolution", where my software development experience was crucial for ensuring precise control of hormone measurement instruments. This involved coding serial port communication with the instruments, applying mathematical calculations for hormone measurement indicators in contraceptives, and designing specific functionalities to validate batch sales of contraceptives. This contribution advances the fields of health and medicine, critical areas for development and innovation.

"YClick!": In this project, my experience as a software developer and technical lead was essential for developing a technology application for certification and payment services in the energy industry, specifically for YPF S.A. I contributed to designing and implementing functionalities supporting the entire transaction process, from request generation to automatic invoice submission for certified service payments. Additionally, a cloud-based microservices architecture was designed to ensure project scalability over time.

AWARDS AND RECOGNITIONS

I have been recognized for my ability to work effectively in teams, creatively solve problems, and meet established deadlines, contributing to the success of various projects and earning recognition from colleagues and supervisors.

Recognitions Received:

- Practice Leader (Midas Consultores)
 - Leader with the largest team in their practice (Midas Consultores)
 - Dedication and commitment over 5 years (Midas Consultores)
-
